## The Value of a Second Opinion

Since 2013, CareFirst, along with Best Doctors, has offered a virtual second opinion program called Expert Consult.

The program's goal is to help members make informed healthcare and treatment decisions with the support of a broad network of expert physicians. The program is particularly helpful for members whose symptoms are not improving, have no diagnosis, want to confirm a diagnosis or whose treatment path may be unclear.

Two new fliers have been developed for [members](#) and [accounts](#), to further promote the Expert Consult program.

Please refer to the June 25 [broker news](#) for more information.
